**U.S. Department of Veterans Affairs**

Veterans Health Administration  
Office of Community Care

# *Community Care- Decision Support Tool (DST) Office Hours*

(b)(6)

# Decision Support Tool (DST) Office Hours

DST office hours will take place the third Monday of each month. First session starting 6/15/2020  
DST office hour information:

<https://vacctraining.adobeconnect.com/dstoh/> Time: 3:00-4:00pm ET (800) 767-1750 Participant Code: 85286 The call will consist of an overview of any DST updates and an open forum question and answer session to assist participants in utilizing DST.

# Upcoming Decision Support Tool (DST) Changes

Office of Community Care is currently working on improved functionality for DST that will include the following:

- Clinical Services Synonyms-** Ability to find the correct clinical service in the drop-down based on a search of common clinical service synonyms. For example: User enters “Acupuncture” and is returned the official Clinical Service value of “Complementary and Integrative Health Treatment”. [May 19, 2020]
- Clinical Service Mapping Updates-** Updates to the Clinical Service mapping to align with the MCAO FY20 Mid-Year Active Stop Codes list. [May 19, 2020]
- Community Wait Time-** The Facilities list will now show the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service. [June 22, 2020]
- Adjustment to VHA Average Wait Time-** The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments. [June 22, 2020]

# Clinical Services Synonyms

- As of May 19, 2020, DST supports Clinical Service Synonyms. When you are selecting the clinical service, you can start typing the value you are looking for. Common synonyms are searchable and will appear in the drop down along with the official clinical service name. When you select a Clinical service synonym from the drop-down list, the official clinical service name will be displayed. Only official clinical service names will be saved with the DST information and written to the consult when signed. Example: Value typed in the Clinical Service field: Acupuncture  
Clinical Service drop-down option displays: Acupuncture <Complementary and Integrative Health Treatment> When selected, Clinical Service field displays: Complementary and Integrative Health Treatment

# Clinical Service Mapping Updates

- As of May 19, 2020, the following Clinical Services have been added and are available for selection in DST, per the MCAO FY20 Mid-Year Active Stop Codes list ([http://vaww.dss.med.va.gov/programdocs/pd\\_oident.asp](http://vaww.dss.med.va.gov/programdocs/pd_oident.asp)):391 Cardiac ECHO392 Ambulatory ECG MonitoringThe following Clinical Services have been renamed, per the MCAO FY20 Mid-Year Active Stop Codes list ([http://vaww.dss.med.va.gov/programdocs/pd\\_oident.asp](http://vaww.dss.med.va.gov/programdocs/pd_oident.asp)):311 Cardiac Implantable Electronic Devices (CIED) (previously Pacemaker)372 Weight Management and MOVE! Program- Individual (previously MOVE! Program- Individual)

# Community Care Average Wait Time

- Beginning on June 22, 2020, DST will display the average wait times of all community care appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). The mapping table that indicates which SEOCs are associated with each clinical service is available on the DST SharePoint site:  
<https://dvagov.sharepoint.com/sites/vacovha/DUSHCC/DC/DO/CI/S/Decision%20Support%20Tool/Forms/AllItems.aspx>

# Community Care Average Wait Time

The average wait times reflected for community care appointments are based on the community care appointments captured in HSRM. The specific calculation is based on the following:

- Days between the appointment made date and the appointment date based on HSRM calculations
- HSRM referrals with an appointment in booked or completed status and an appointment date time within the past 90 days
- Exclusions
- Appointments with a null made date or appointment date
- Appointments with a made date greater than the appointment date

No minimum referral number required in order to capture the community care wait time average

# Community Care Average Wait Time

- The addition of the community care average wait time to DST will assist end users, to include the Referral Coordination Team (RCT) and specialty clinic schedulers, when having that thoughtful conversation with Veterans regarding their VA and community care options and the average wait times both in VA and community care. It is important to note: DST is providing the average wait time for both calculations and not the exact wait time. The methodology of the calculations is similar but a different date parameter is applied. In both situations, the exact wait time is determined at the time of scheduling into the specific clinic where the Veteran is to be seen, when knowledge of the next available appointment is accessible. The data for facility community care offices currently under PC3 that have the TPA schedule for them will not be all inclusive, as these sites do not use HSRM to process community care referrals. The data for these sites will reflect the most up to date average community care wait time once they begin to use HSRM for referral management.

# Community Care Average Wait Time

When having the conversation with the Veteran, after community care eligibility has been determined, the end user should be aware of the following:

1. Available options within the VA to provide the care (i.e. Interfacility Consult (IFC), e-consult, Telehealth (TH) etc.)
2. Review the average wait times in the community and within the VA for the care being requested in order to provide the patient with an overall idea on the appointment wait time, once the request is routed.
3. Emphasize that the average community wait times presented in DST are not reflective of the actual available appointments at any one community provider's office, but an average of all community providers who offer the service to Veterans seen at this VAMC's Healthcare system (CBOCs and off-site facilities).
4. If the Veteran opts into community care, capture their Community Care Scheduling Preferences (per Field Guidebook chapter 2, section 2.19) prior to forwarding the consult to a community care consult title.

# DST VHA Average Wait Time

- During the COVID-19 Pandemic, many VA facilities have seen a reduction in the number of face to face VHA appointments scheduled or have been offering telehealth alternatives for more than 60 days. For this reason, some VA facilities that do offer specific services are no longer seeing this information reflected in the DST facilities list. To resolve this issue, the algorithm used to capture VHA Average Wait Time data in DST will be temporarily updated to identify VA facilities within the search radius that report pending or completed appointments back to January 1, 2020 linked to consults associated with the stop code of the selected clinical service. Facilities that only offer the service via telehealth are excluded. The search radius logic in DST searches the Provider Profile Management System (PPMS) for VA facilities within a defined radius of the Veteran's residential address (100 miles for Specialty Care; 40 miles for Primary Care / Mental Health) that may offer the requested service.

# Frequently Asked Questions

**What must be installed on my desktop for DST to work? Consult Toolbox v1.9.0065 with the DST URL defined must be installed on the user's computer; the user must ensure that Consult Toolbox is enabled (CPRS Tools Menu - Consult Toolbox - Enable). In addition, a patch must be installed at the user's VistA site in order for the DST data to be added to the consult when the order is signed. Furthermore, the Google Chrome web browser must be installed on the user's machine. If you are unsure if your computer is compatible with DST, please contact your local IT staff.**

# Frequently Asked Questions

**Is it required that all community care consults have at least one (1) staff person run DST on it? No, use of the DST is not nationally mandated for any VA staff person. Providers may choose not to launch DST. Even if the provider has not run DST, it is not required that the scheduler use DST. Nevertheless, use of DST is highly encouraged in order to review a Veteran's eligibility for Community Care and document the care decision. Also, if the ordering provider strongly feels that the Veteran is eligible for community care based on Best Medical Interest, the ordering provider should launch DST at the time of entering the consult and capture the BMI eligibility at that time. The consult will still be routed to the (RCT) or Specialty clinic for review and final referral to community care, if appropriate.**

# Frequently Asked Questions

**Why doesn't the residential address in DST match the Veteran's current address? DST displays the Veteran's residential address as documented in the Enrollment System (ES), not CPRS. If the address in DST is incorrect, please make the needed update in the ES. You may need to work with your facility enrollment office to make the appropriate corrections in ES. Allow two to three (2-3) business days for the change to reach DST.**

# Frequently Asked Questions

**Cardiology at our VAMC shows an average wait time of 20 days in the DST and our real clinic availability is out about 50 days. DST does not allow us to show that the eligibility is really due to wait time. Why doesn't DST's wait time data match our availability? It's important to note two (2) things: Average wait time and next available appointment are different metrics. We would never expect average wait time to match actual clinic availability. Average wait time data in DST is displayed for reference only. DST should not be used to determine wait time eligibility. It is determined on a case by case basis by the MSA at the point of scheduling, who may use Consult Toolbox to document the eligibility and Veteran's opt-in decision.**

# Frequently Asked Questions

**How does DST identify which facilities to display? Sometimes my VAMC doesn't show up, and sometimes a facility on the list does not offer the consult service I'm ordering. DST searches PPMS for VA facilities within a defined radius of the Veteran's residential address (40 miles for Primary Care/Mental Health; 100 miles for Specialty Care) that may offer the requested clinical service. Because clinical service is broader than the specific consult service, DST may display facilities that do not actually offer the specific consult service. DST will display VA facilities within this search radius that report pending or completed appointments within the last 60 days (see Note 2) linked to consults associated with the stop code of the selected clinical service. Facilities that only offer the service via telehealth will be excluded. Note 1: When the selected clinical service is one (1) of the five (5) direct scheduling services, DST will display facilities that have reported workload in the stop code within the last 60 days, regardless of whether the appointments were linked to consults. The five (5) exceptions are: Primary Care, Optometry, Audiology (including Hearing Aid Services), Podiatry, and Nutrition. Note 2: A temporary modification will take effect on June 22, 2020. The algorithm will identify VHA facilities within the search radius that have reported pending or completed appointments from January 1, 2020 onward linked to consults associated with the stop code of the selected clinical service.**

# Frequently Asked Questions

**DST is displaying a facility that does not offer the consult service I'm ordering. How can I correctly capture the Veteran's community care eligibility? In the case that the DST facility list misrepresents a Veteran's community care eligibility, VA staff may use Consult Toolbox at the time of forwarding the internal VA consult to a community care consult to document the eligibility, as appropriate.**

# Action Required & Resources

**Action Required:** In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065. **Resources** DST SharePoint site:

# MISSION Act Quality Standards and Related Activities

VHA Office of Quality and Patient Safety (QPS)  
September 1, 2021

**VA**

U.S. Department  
of Veterans Affairs

## MISSION Act Quality – Overview

### **VA Standards for Quality (MISSION Act Section 104 - § 1703C)**

- Identify a common set of quality standards
- Compare performance to the community and analyze at the level of medical service lines
- Serve as the foundation for subsequent eligibility decisions for Community Care

### **Quality Criterion for Community Care Eligibility (MISSION Act Section 101 - § 1703[e])**

- Provides the authority to VA to enable eligibility for Community Care by designating VA medical service lines based on the quality criterion
- Affects VA medical service lines not complying with VA standards for quality, as determined through measures of both timeliness and quality

### **Remediation of Medical Service Lines (MISSION Act Section 109 - § 1706A)**

- Required for designated VA medical service lines
- Requires extensive Congressional response and public awareness

MISSION Act-specific needs, distinct from routine VHA improvement and consultation

## VA Standards for Quality and Measures\*

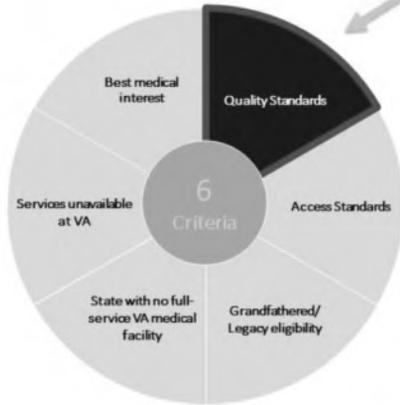

VHA Standards	Initial Measures
<b>Timely Care:</b> Provided without inappropriate or harmful delays	Patient-reported measures on getting timely appointments, care, and information Wait times for outpatient care
<b>Effective Care:</b> Based on scientific knowledge of what is likely to provide benefit to Veterans	Smoking and Tobacco Use Cessation Immunization for Influenza Breast and Cervical Cancer Screening Mortality Rates - Risk Adjusted Controlling high blood pressure Beta-blocker treatment after heart attack Comprehensive Diabetes Care – Blood Pressure and Glucose control Improvement in function (short-stay nursing home patients) Newly received antipsychotic medications (short-stay nursing home patients)
<b>Safe Care:</b> Avoids harm from care that is intended to help Veterans	Catheter and central line associated infection rates C. difficile infection rate Death rate among surgical patients with serious treatable complications Nursing home safety measures
<b>Veteran-Centered Care:</b> Anticipates and responds to Veterans specific needs	Patient's overall rating of the Provider Patient's rating of Coordination of Care HCAHPS Overall Rating of Hospital HCAHPS Care Transition Measure

\*This represents a condensed version of the list of measures posted on the Federal Register on 10/3/2019

## Things to Remember...

- VA standards for quality reflect care that is **timely, effective, safe, and Veteran-centered**.
- VA **compares its care** to the care provided in the community.
- Where VA compares favorably to the community, **that's great!**
- Where we do not, we are committed to improving our care.
- If there is a **significant or serious concern**, Veterans have the option to receive care in the community for specific medical services that do not meet the VA standards for quality and timeliness while remediations are underway at their VA facility.

## Quality Criterion for Community Care Eligibility Section 101 - § 1703[e]

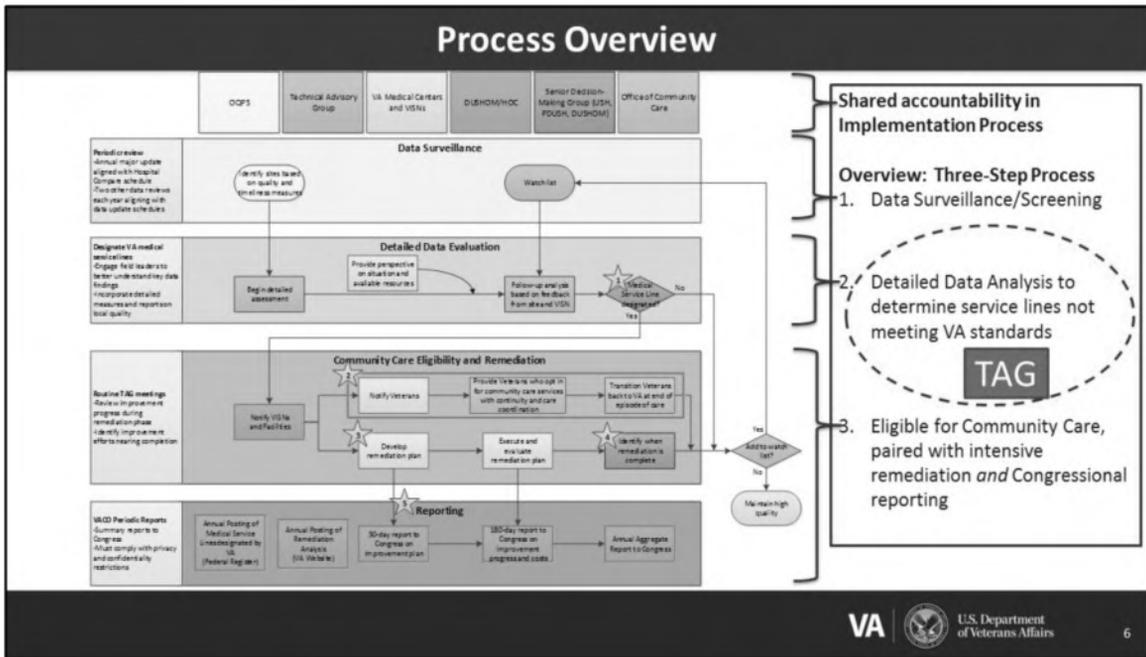

Veterans may be provided the option for community care if a medical service line\* does not meet VA's standards for quality based on two conditions:

- Quality – compared to community (2 or more measures)
- Timeliness – compared to same service line at other VA facilities

*Example: If VA has identified that the cardiology service line at a local VA medical facility is not providing care that meets VA's standards for quality, the Veteran may be able to elect to receive their cardiology care in the community. However, there may be limits on when, where, and what is available under this criterion.*

\*Medical service line - "a specific medical service or set of services delivered in a VA facility."  
Source: VA regulations (AQ-46)

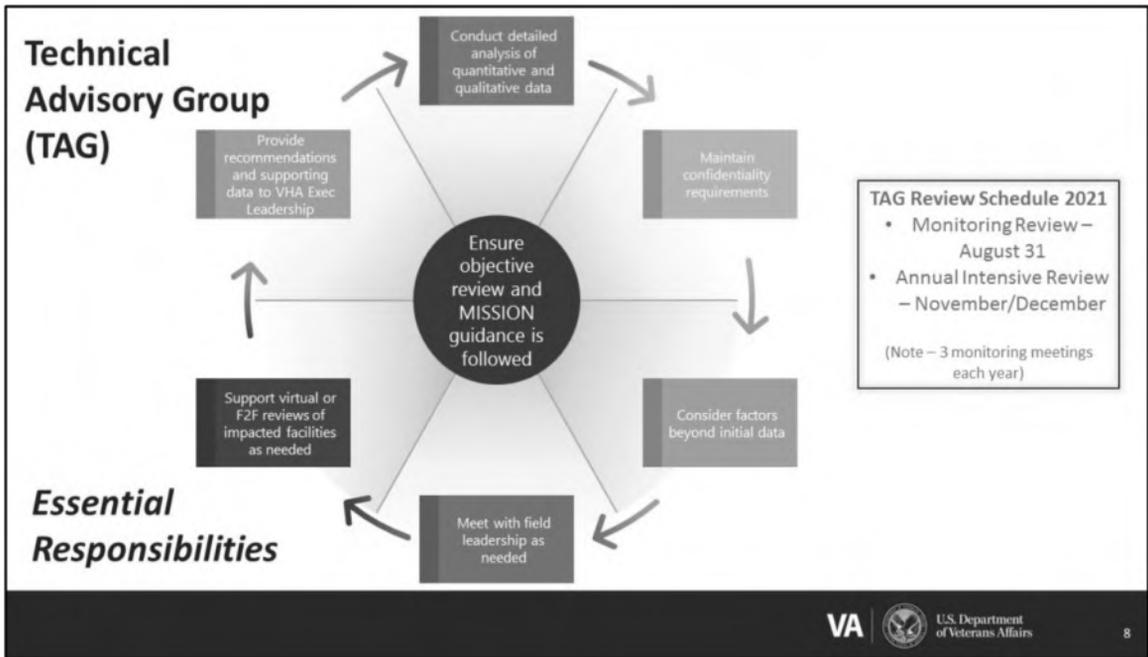

## Surveillance Logic Leading to Technical Advisory Group (TAG) Evaluation

### Data Surveillance

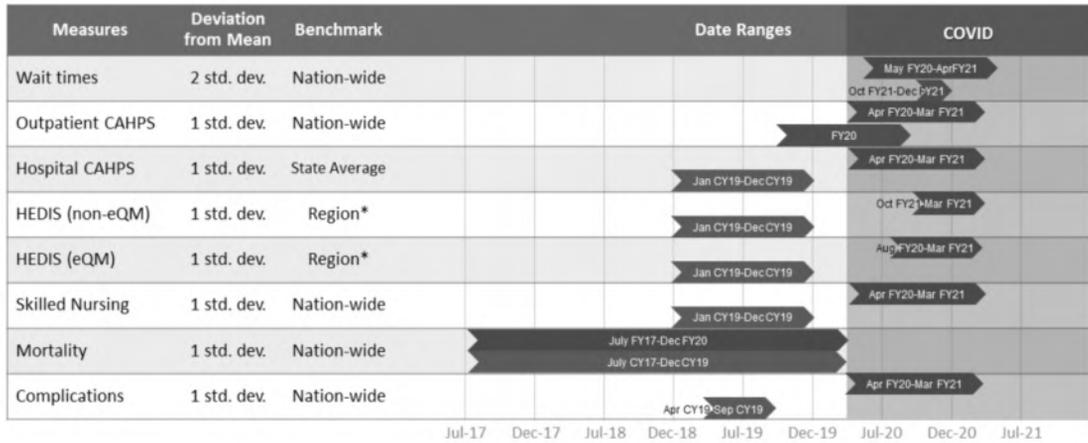

- Measures are triggered through comparisons against a benchmark (one or two standard deviations worse than the benchmark average)
  - Timeliness measures are compared with internal VA data
  - Quality measures are primarily compared with community data
- Medical Service Lines are flagged in timeliness and/or quality
  - Flagging is based on the number of triggered measures
  - For example, Primary Care at Everytown VAMC is flagged in quality due to triggering in two quality measures

### Detailed Data Evaluation

- Any Medical Service Line flagged in both timeliness and quality is brought to the TAG for further evaluation
- The TAG reports Detailed Data Evaluation findings to the Senior Decision-Making Group (USH's Office) to inform their recommendations to the VA Secretary on medical service lines to be designated

## VA and Community Surveillance Data Availability

■ VA ■ Community ■ VA Baseline

\*Some facilities were scored against a national benchmark due to a lack of sufficient sample sizes for regional data (flu and tobacco measures)

MISSION TAG Monitoring  
Review August 31, 2021

## Surveillance Summary: Medical Services

(Two sites flagged for TAG review during this surveillance interval)

### Triggering Timeliness Measures (Top 3)

- Cardiology CAHPS Access (24)
- Primary Care CAHPS Access (17)
- Women's Health CAHPS Access (13)

### Triggering Quality Measures

- Flu Immunizations (137)
- CAHPS Provider Rating (13)
- Breast Cancer Screening (12)
- CAHPS Care Coordination (12)
- Cervical Cancer Screening (7)
- DM – Blood Pressure Control (4)

LEGEND		MSL Results from Timeliness Comparison (Internal VA)		
		Flagged	Triggering Measure	No Triggering Measures
MSL Results from Quality Comparison (With Community)	For TAG review before SDMG recommendations	2 (2 more than previous surveillance interval)	11 (10 more than previous surveillance interval)	16 (14 more than previous surveillance interval)
	For standard VHA improvement processes	0 (1 fewer than previous surveillance interval)	9 (6 more than previous surveillance interval)	124 (78 more than previous surveillance interval)
	No performance issues identified	3 (3 fewer than previous surveillance interval)	39 (20 more than previous surveillance interval)	347 (120 fewer than previous surveillance interval)

MISSION TAG Monitoring  
Review August 31, 2021

## Surveillance Summary: Hospital Care

(No sites flagged for TAG review during this surveillance interval)

### Triggering Quality Measures

- CLABSI (18)
- CAUTI (13)
- HCAHPS Hospital Rating (11)
- HCAHPS Care Transition (10)

Due to the lack of timeliness measures, Inpatient medical service lines **may not be designated** by the VA Secretary, per MISSION Act requirements.

LEGEND		MSL Results from Timeliness Comparison (Internal VA)		
		Flagged	Triggering Measure	No Triggering Measures
MSL Results from Quality Comparison (With Community)	For TAG review before SDMG recommendations	N/A	N/A	<b>13</b> (4 <b>more</b> than previous surveillance interval)
	For standard VHA improvement processes	N/A	N/A	<b>24</b> (7 <b>fewer</b> than previous surveillance interval)
	No performance issues identified	N/A	N/A	<b>92</b> (2 <b>more</b> than previous surveillance interval)

MISSION TAG Monitoring  
Review August 31, 2021

## Surveillance Summary: Extended Care Services

(No sites flagged for TAG review during this surveillance interval)

**Triggering Quality Measures:**

*Short Stay*

- Antipsychotic Medications (26)
- Functional Improvement (8)
- Pressure Ulcer (0)

**Triggering Quality Measures:**

*Long Stay*

- Falls with Major Injury (4)
- Physical Restraints (3)

Due to the lack of timeliness measures, Skilled Nursing Home medical service lines **may not be designated** by the VA Secretary, per MISSION Act requirements.

LEGEND		MSL Results from Timeliness Comparison (Internal VA)		
		Flagged	Triggering Measure	No Triggering Measures
	For TAG review before SDMG recommendations			
	For standard VHA improvement processes			
	No performance issues identified			
MSL Results from Quality Comparison (With Community)	Flagged	N/A	N/A	<b>7</b> (3 <b>more</b> than previous surveillance interval)
	Triggering Measure	N/A	N/A	<b>27</b> (3 <b>fewer</b> than previous surveillance interval)
	No Triggering Measure	N/A	N/A	<b>98</b> (same as previous surveillance interval)

## Remediation of Medical Service Lines – Section 109 - § 1706A

- **Required** for those occasions **where VA medical service lines are designated** based on the quality standards criterion for Community Care eligibility
- **Community care eligibility** concludes when **remediation is complete** (service line meets standards)
- Requires extensive response:
  - **Federal Register posting of service lines** that did not meet VA standards
  - **Remediation action plan** submitted within 30 days
  - **Identification of VAMC, VISN, VHA Central Office individuals accountable** for remediation of medical service line to meet VA standards for quality
  - **Ongoing Congressional reporting** of status *and* **cost** of remediation actions
  - Reporting annually on public facing website

MISSION Act-specific needs, distinct from routine VHA improvement and consultation

## Appendix – Supporting Materials

## MISSION Act Requirements

### MISSION Act Requirements – Section 101

- ✓ – Measure quality of a medical service line of a VA facility by comparing it with 2 or more distinct and appropriate quality measures at non-Department medical service lines
- ✓ – Measure timeliness of the medical service line of a VA facility by comparing with the same medical service line at different Department facilities

## Are there differences between the quality criterion and other eligibility criteria for community care?

### Other Eligibility Criteria

- Criteria are applied on a **case-by-case basis** using information **specific to each Veteran**. **Veteran decision to opt-in or opt-out**
- The **decision to use the criteria is made at the clinic or provider level**
- Available for use any time a Veteran is eligible, **without any limit**
- These criteria are **always active**, so Veterans are eligible **any time the conditions are met**

### Standards for Quality

- Criterion applies to the **entire medical service line based on analysis for care**. **Veteran decision to opt-in or opt-out**
- The **decision to use the criterion is made by the VA Secretary** based on the analysis of the data
- **Cap limit placed by Congress on the number of service lines eligible (3 locally and 36 nationally)**
- When the **service line MEETS the standards for quality**, **this eligibility for community care ends**

## Full Measure List by VA Medical Service Line – 11/2020 to Present

Medical Service Line	Timeliness Measures (VA Internal Comparison)	Quality Measures (Community Comparison)	
Primary Care (PC)	% Wait Within 20 Days from CD CAHPS Routine (bottom box) CAHPS Urgent (bottom box) CAHPS Questions (bottom box)	Smoking and Tobacco Cessation Counselling Flu Immunization Controlling High Blood Pressure** Risk Adjusted Mortality Rate for CHF** Beta-Blocker Treatment After Heart Attacks**	Diabetes Management – HbA1c Poor Control** Diabetes Management – Blood Pressure Control** Care Coordination Overall Rating of Provider
Women's Health (WH)	% Wait Within 20 Days from CD CAHPS Routine (bottom box) CAHPS Urgent (bottom box) CAHPS Questions (bottom box)	Breast Cancer Screening Cervical Cancer Screening	
Cardiology (Card)	% Wait Within 28 Days from CD CAHPS Routine (bottom box) CAHPS Urgent (bottom box) CAHPS Questions (bottom box)	Controlling High Blood Pressure** Risk Adjusted Mortality Rate for CHF**	Risk Adjusted Mortality Rate for AMI Beta-Blocker Treatment After Heart Attacks**
Endocrinology (PC)	% Wait Within 28 Days from CD	Diabetes Management – HbA1c Poor Control**	Diabetes Management – Blood Pressure Control**
Skilled Nursing Facilities (SNF)*	N/A	Functional Improvement (Short Stay) Antipsychotic Medications (Short Stay) Pressure Ulcers (Short Stay)	Physical Restraints (Long Stay) Falls with Major Injury (Long Stay)
Acute Medicine & Surgery (AMS)*	N/A	Risk Adjusted Mortality Rate for COPD Risk Adjusted Mortality Rate for Pneumonia Catheter Associated Urinary Tract Infection Central Line Associated Bloodstream Infection	C. Diff Infection Surgical Mortality Rate – Severe Complications Care Transition Overall Rating of Hospital

\* No timeliness measures are available for this medical service line, so it is not able to be designated according to MISSION Act requirements.

\*\* Measure not able to be broken out with MSL-specific filters, so same aggregate data is used to flag both MSLs using this measure.

U.S. Department  
of Veterans Affairs

## Factors for Consideration in TAG Evaluation

- VA Regulations specify that consideration of additional factors will occur prior to designation decision
- Consideration during detailed data evaluation is not limited to these factors alone

Factor	Description*
Clinical Significance	Whether the differences between performance of individual VA medical service lines, and between performance of VA medical service lines and non-VA medical service lines are clinically significant.
Ease of Remediation	Likelihood and ease of remediation of the VA medical service line within a short timeframe.
Recent Trends	Recent trends concerning the VA medical service line or non-VA medical service line.
Number of Covered Veterans	The number of covered Veterans served by the medical service line or that could be affected by the designation.
Impact on Patient Outcomes	The potential impact on patient outcomes.
Collateral Effects	The effect that designating one VA medical service line would have on other VA medical service lines.

\* From 38 CFR Part 17 § 17.4015 (e)

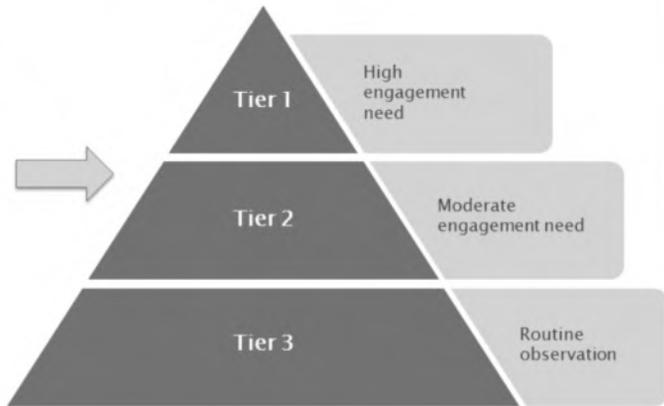

## What about VAMCs needing support outside the MISSION process?

- It is anticipated that there may be VAMCs with medical service lines which are experiencing challenges but do not meet the requirements for MISSION Act related remediation.
- Remediation efforts under the parameters of the MISSION Act are separate from VHA's ongoing consultation, improvement and monitoring activities undertaken by VISNs and VHACO Program Offices.
- **Sites *not* triggered under MISSION** – the TAG has the option to recommend that a VAMC medical service line (*not triggered under MISSION*) explore support options from the VISN or relevant program office to help drive quality improvement and high value care for Veterans.
- **Sites triggered under MISSION** – the TAG may also recommend additional VISN or programmatic support for sites *triggered under MISSION* as an adjunct to formal remediation. In these cases, reporting of other improvement efforts is completed through existing channels – separate to the specific remediation reporting requirements under the Act.

## QPS/CIC's Engagement Protocol for Improvements in Quality (EPIQ)

### Strategic Engagement Needs Algorithm (SENA)

- ✔ **Relative Comparison**
  - ≥40% metrics in 5<sup>th</sup> quintile of SAIL
  - ≥65% metrics in 4<sup>th</sup> or 5<sup>th</sup> quintiles of SAIL
- ✔ **Absolute Improvement or Decline**
  - >50% of all SAIL metrics worsened from 1 year ago
  - >50% of all SAIL supporting indicators worsened from 1 year ago

## Surveillance Logic Leading to Technical Advisory Group (TAG) Evaluation

### Data Surveillance

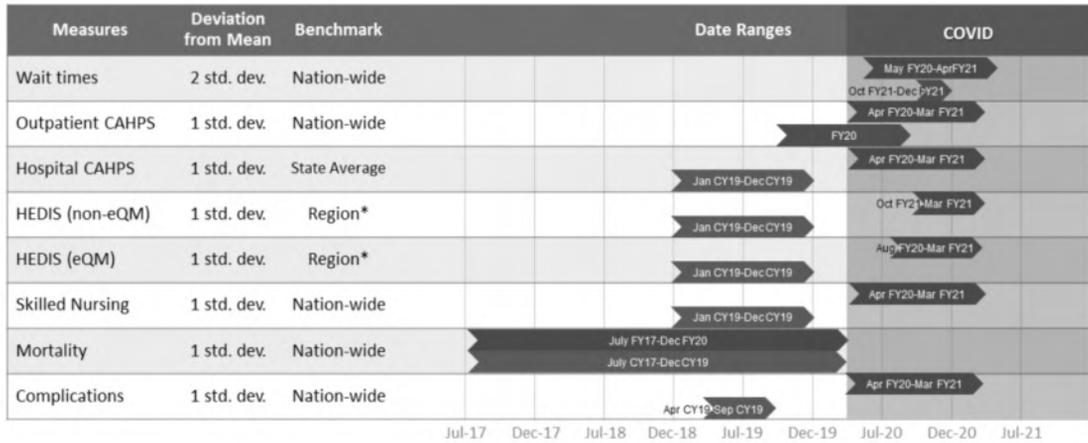

- Measures are triggered through comparisons against a benchmark (one or two standard deviations worse than the benchmark average)
  - Timeliness measures are compared with internal VA data
  - Quality measures are primarily compared with community data
- Medical Service Lines are flagged in timeliness and/or quality
  - Flagging is based on the number of triggered measures
  - For example, Primary Care at Everytown VAMC is flagged in quality due to triggering in two quality measures

### Detailed Data Evaluation

- Any Medical Service Line flagged in both timeliness and quality is brought to the TAG for further evaluation
- The TAG reports Detailed Data Evaluation findings to the Senior Decision-Making Group (USH's Office) to inform their recommendations to the VA Secretary on medical service lines to be designated

## VA and Community Surveillance Data Availability

■ VA ■ Community ■ VA Baseline

\*Some facilities were scored against a national benchmark due to a lack of sufficient sample sizes for regional data (flu and tobacco measures)

MISSION TAG Monitoring  
Review August 31, 2021

## Surveillance Summary: Medical Services

(Two sites flagged for TAG review during this surveillance interval)

### Triggering Timeliness Measures (Top 3)

- Cardiology CAHPS Access (24)
- Primary Care CAHPS Access (17)
- Women's Health CAHPS Access (13)

### Triggering Quality Measures

- Flu Immunizations (137)
- CAHPS Provider Rating (13)
- Breast Cancer Screening (12)
- CAHPS Care Coordination (12)
- Cervical Cancer Screening (7)
- DM – Blood Pressure Control (4)

LEGEND		MSL Results from Timeliness Comparison (Internal VA)		
		Flagged	Triggering Measure	No Triggering Measures
MSL Results from Quality Comparison (With Community)	For TAG review before SDMG recommendations	<b>2</b> (2 <b>more</b> than previous surveillance interval)	<b>11</b> (10 <b>more</b> than previous surveillance interval)	<b>16</b> (14 <b>more</b> than previous surveillance interval)
	For standard VHA improvement processes	<b>0</b> (1 <b>fewer</b> than previous surveillance interval)	<b>9</b> (6 <b>more</b> than previous surveillance interval)	<b>124</b> (78 <b>more</b> than previous surveillance interval)
	No performance issues identified	<b>3</b> (3 <b>fewer</b> than previous surveillance interval)	<b>39</b> (20 <b>more</b> than previous surveillance interval)	<b>347</b> (120 <b>fewer</b> than previous surveillance interval)

MISSION TAG Monitoring  
Review August 31, 2021

## Surveillance Summary: Hospital Care

(No sites flagged for TAG review during this surveillance interval)

### Triggering Quality Measures

- CLABSI (18)
- CAUTI (13)
- HCAHPS Hospital Rating (11)
- HCAHPS Care Transition (10)

Due to the lack of timeliness measures, Inpatient medical service lines **may not be designated** by the VA Secretary, per MISSION Act requirements.

LEGEND		MSL Results from Timeliness Comparison (Internal VA)		
		Flagged	Triggering Measure	No Triggering Measures
MSL Results from Quality Comparison (With Community)	Flagged	N/A	N/A	<b>13</b> (4 <b>more</b> than previous surveillance interval)
	Triggering Measure	N/A	N/A	<b>24</b> (7 <b>fewer</b> than previous surveillance interval)
	No Triggering Measure	N/A	N/A	<b>92</b> (2 <b>more</b> than previous surveillance interval)

MISSION TAG Monitoring  
Review August 31, 2021

## Surveillance Summary: Extended Care Services

(No sites flagged for TAG review during this surveillance interval)

**Triggering Quality Measures:**

*Short Stay*

- Antipsychotic Medications (26)
- Functional Improvement (8)
- Pressure Ulcer (0)

**Triggering Quality Measures:**

*Long Stay*

- Falls with Major Injury (4)
- Physical Restraints (3)

Due to the lack of timeliness measures, Skilled Nursing Home medical service lines **may not be designated** by the VA Secretary, per MISSION Act requirements.

LEGEND		MSL Results from Timeliness Comparison (Internal VA)		
		Flagged	Triggering Measure	No Triggering Measures
	For TAG review before SDMG recommendations			
	For standard VHA improvement processes			
	No performance issues identified			
MSL Results from Quality Comparison (With Community)	Flagged	N/A	N/A	<b>7</b> (3 <b>more</b> than previous surveillance interval)
	Triggering Measure	N/A	N/A	<b>27</b> (3 <b>fewer</b> than previous surveillance interval)
	No Triggering Measure	N/A	N/A	<b>98</b> (same as previous surveillance interval)

## Remediation of Medical Service Lines – Section 109 - § 1706A

- **Required** for those occasions **where VA medical service lines are designated** based on the quality standards criterion for Community Care eligibility
- **Community care eligibility** concludes when **remediation is complete** (service line meets standards)
- Requires extensive response:
  - **Federal Register posting of service lines** that did not meet VA standards
  - **Remediation action plan** submitted within 30 days
  - **Identification of VAMC, VISN, VHA Central Office individuals accountable** for remediation of medical service line to meet VA standards for quality
  - **Ongoing Congressional reporting** of status *and* **cost** of remediation actions
  - Reporting annually on public facing website

MISSION Act-specific needs, distinct from routine VHA improvement and consultation

## Mission Act Quality Standards Tracking Report (MAQSTR)

The MISSION Act Quality Standards Tracking Report (MAQSTR) is designed to help compare VHA performance measure results to comparable community benchmarks

The main report displays:

- Measure Domains
- Short description of performance measures
- Preferred data direction
- Short description of performance measures
- Quarterly and yearly data
- Community scores
- Facility prior year score
- Links to the source reports
- Measure data timeframes

Measure	Measure Direction	FY19 Q4	FY19 Q3	FY19 Q2	FY19 Q1	Facility Score	Community Score	Community Score Range
CRF Risk-Adjusted Mortality Rate for COPD	Lower is better	5.1	5.4	5.9	5.8	5.8	5.8	5.8-6.2

## Appendix – Supporting Materials

## MISSION Act Requirements

### MISSION Act Requirements – Section 101

- ✓ – Measure quality of a medical service line of a VA facility by comparing it with 2 or more distinct and appropriate quality measures at non-Department medical service lines
- ✓ – Measure timeliness of the medical service line of a VA facility by comparing with the same medical service line at different Department facilities

## Are there differences between the quality criterion and other eligibility criteria for community care?

### Other Eligibility Criteria

- Criteria are applied on a **case-by-case basis** using information **specific to each Veteran**. **Veteran decision to opt-in or opt-out**
- The **decision to use the criteria is made at the clinic or provider level**
- Available for use any time a Veteran is eligible, **without any limit**
- These criteria are **always active**, so Veterans are eligible **any time the conditions are met**

### Standards for Quality

- Criterion applies to the **entire medical service line based on analysis for care**. **Veteran decision to opt-in or opt-out**
- The **decision to use the criterion is made by the VA Secretary** based on the analysis of the data
- **Cap limit placed by Congress on the number of service lines eligible (3 locally and 36 nationally)**
- When the **service line MEETS the standards for quality**, **this eligibility for community care ends**

VA

U.S. Department  
of Veterans Affairs

17

## Full Measure List by VA Medical Service Line – 11/2020 to Present

Medical Service Line	Timeliness Measures (VA Internal Comparison)	Quality Measures (Community Comparison)	
Primary Care (PC)	% Wait Within 20 Days from CD CAHPS Routine (bottom box) CAHPS Urgent (bottom box) CAHPS Questions (bottom box)	Smoking and Tobacco Cessation Counselling Flu Immunization Controlling High Blood Pressure** Risk Adjusted Mortality Rate for CHF** Beta-Blocker Treatment After Heart Attacks**	Diabetes Management – HbA1c Poor Control** Diabetes Management – Blood Pressure Control** Care Coordination Overall Rating of Provider
Women's Health (WH)	% Wait Within 20 Days from CD CAHPS Routine (bottom box) CAHPS Urgent (bottom box) CAHPS Questions (bottom box)	Breast Cancer Screening Cervical Cancer Screening	
Cardiology (Card)	% Wait Within 28 Days from CD CAHPS Routine (bottom box) CAHPS Urgent (bottom box) CAHPS Questions (bottom box)	Controlling High Blood Pressure** Risk Adjusted Mortality Rate for CHF**	Risk Adjusted Mortality Rate for AMI Beta-Blocker Treatment After Heart Attacks**
Endocrinology (PC)	% Wait Within 28 Days from CD	Diabetes Management – HbA1c Poor Control**	Diabetes Management – Blood Pressure Control**
Skilled Nursing Facilities (SNF)*	N/A	Functional Improvement (Short Stay) Antipsychotic Medications (Short Stay) Pressure Ulcers (Short Stay)	Physical Restraints (Long Stay) Falls with Major Injury (Long Stay)
Acute Medicine & Surgery (AMS)*	N/A	Risk Adjusted Mortality Rate for COPD Risk Adjusted Mortality Rate for Pneumonia Catheter Associated Urinary Tract Infection Central Line Associated Bloodstream Infection	C. Diff Infection Surgical Mortality Rate – Severe Complications Care Transition Overall Rating of Hospital

\* No timeliness measures are available for this medical service line, so it is not able to be designated according to MISSION Act requirements.

\*\* Measure not able to be broken out with MSL-specific filters, so same aggregate data is used to flag both MSLs using this measure.

U.S. Department  
of Veterans Affairs

## Factors for Consideration in TAG Evaluation

- VA Regulations specify that consideration of additional factors will occur prior to designation decision
- Consideration during detailed data evaluation is not limited to these factors alone

Factor	Description*
Clinical Significance	Whether the differences between performance of individual VA medical service lines, and between performance of VA medical service lines and non-VA medical service lines are clinically significant.
Ease of Remediation	Likelihood and ease of remediation of the VA medical service line within a short timeframe.
Recent Trends	Recent trends concerning the VA medical service line or non-VA medical service line.
Number of Covered Veterans	The number of covered Veterans served by the medical service line or that could be affected by the designation.
Impact on Patient Outcomes	The potential impact on patient outcomes.
Collateral Effects	The effect that designating one VA medical service line would have on other VA medical service lines.

\* From 38 CFR Part 17 § 17.4015 (e)

VA

U.S. Department  
of Veterans Affairs

19

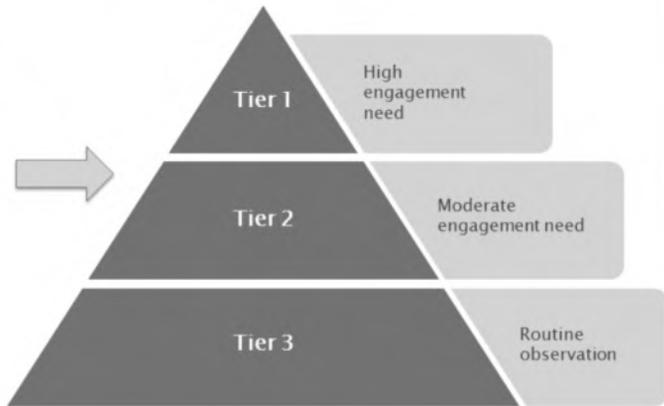

## What about VAMCs needing support outside the MISSION process?

- It is anticipated that there may be VAMCs with medical service lines which are experiencing challenges but do not meet the requirements for MISSION Act related remediation.
- Remediation efforts under the parameters of the MISSION Act are separate from VHA's ongoing consultation, improvement and monitoring activities undertaken by VISNs and VHACO Program Offices.
- **Sites *not* triggered under MISSION** – the TAG has the option to recommend that a VAMC medical service line (*not triggered under MISSION*) explore support options from the VISN or relevant program office to help drive quality improvement and high value care for Veterans.
- **Sites triggered under MISSION** – the TAG may also recommend additional VISN or programmatic support for sites *triggered under MISSION* as an adjunct to formal remediation. In these cases, reporting of other improvement efforts is completed through existing channels – separate to the specific remediation reporting requirements under the Act.

## QPS/CIC's Engagement Protocol for Improvements in Quality (EPIQ)

### Strategic Engagement Needs Algorithm (SENA)

- ✔ **Relative Comparison**
  - ≥40% metrics in 5<sup>th</sup> quintile of SAIL
  - ≥65% metrics in 4<sup>th</sup> or 5<sup>th</sup> quintiles of SAIL
- ✔ **Absolute Improvement or Decline**
  - >50% of all SAIL metrics worsened from 1 year ago
  - >50% of all SAIL supporting indicators worsened from 1 year ago
- ✔ **Community Comparison**
  - Under-served VA (Mental Health and Primary Care)
  - **MISSION Act (Monitor List)**

# MISSION Act Quality Standards and Related Activities

VHA Office of Quality and Patient Safety (QPS)  
September 1, 2021

**VA**

U.S. Department  
of Veterans Affairs

## MISSION Act Quality – Overview

### **VA Standards for Quality (MISSION Act Section 104 - § 1703C)**

- Identify a common set of quality standards
- Compare performance to the community and analyze at the level of medical service lines
- Serve as the foundation for subsequent eligibility decisions for Community Care

### **Quality Criterion for Community Care Eligibility (MISSION Act Section 101 - § 1703[e])**

- Provides the authority to VA to enable eligibility for Community Care by designating VA medical service lines based on the quality criterion
- Affects VA medical service lines not complying with VA standards for quality, as determined through measures of both timeliness and quality

### **Remediation of Medical Service Lines (MISSION Act Section 109 - § 1706A)**

- Required for designated VA medical service lines
- Requires extensive Congressional response and public awareness

MISSION Act-specific needs, distinct from routine VHA improvement and consultation

## VA Standards for Quality and Measures\*

VHA Standards	Initial Measures
<b>Timely Care:</b> Provided without inappropriate or harmful delays	Patient-reported measures on getting timely appointments, care, and information Wait times for outpatient care
<b>Effective Care:</b> Based on scientific knowledge of what is likely to provide benefit to Veterans	Smoking and Tobacco Use Cessation Immunization for Influenza Breast and Cervical Cancer Screening Mortality Rates - Risk Adjusted Controlling high blood pressure Beta-blocker treatment after heart attack Comprehensive Diabetes Care – Blood Pressure and Glucose control Improvement in function (short-stay nursing home patients) Newly received antipsychotic medications (short-stay nursing home patients)
<b>Safe Care:</b> Avoids harm from care that is intended to help Veterans	Catheter and central line associated infection rates C. difficile infection rate Death rate among surgical patients with serious treatable complications Nursing home safety measures
<b>Veteran-Centered Care:</b> Anticipates and responds to Veterans specific needs	Patient's overall rating of the Provider Patient's rating of Coordination of Care HCAHPS Overall Rating of Hospital HCAHPS Care Transition Measure

\*This represents a condensed version of the list of measures posted on the Federal Register on 10/3/2019

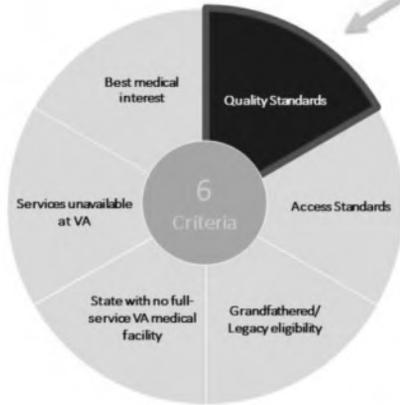

U.S. Department  
of Veterans Affairs

## Things to Remember...

- VA standards for quality reflect care that is **timely, effective, safe, and Veteran-centered**.
- VA **compares its care** to the care provided in the community.
- Where VA compares favorably to the community, **that's great!**
- Where we do not, we are committed to improving our care.
- If there is a **significant or serious concern**, Veterans have the option to receive care in the community for specific medical services that do not meet the VA standards for quality and timeliness while remediations are underway at their VA facility.

## Quality Criterion for Community Care Eligibility Section 101 - § 1703[e]

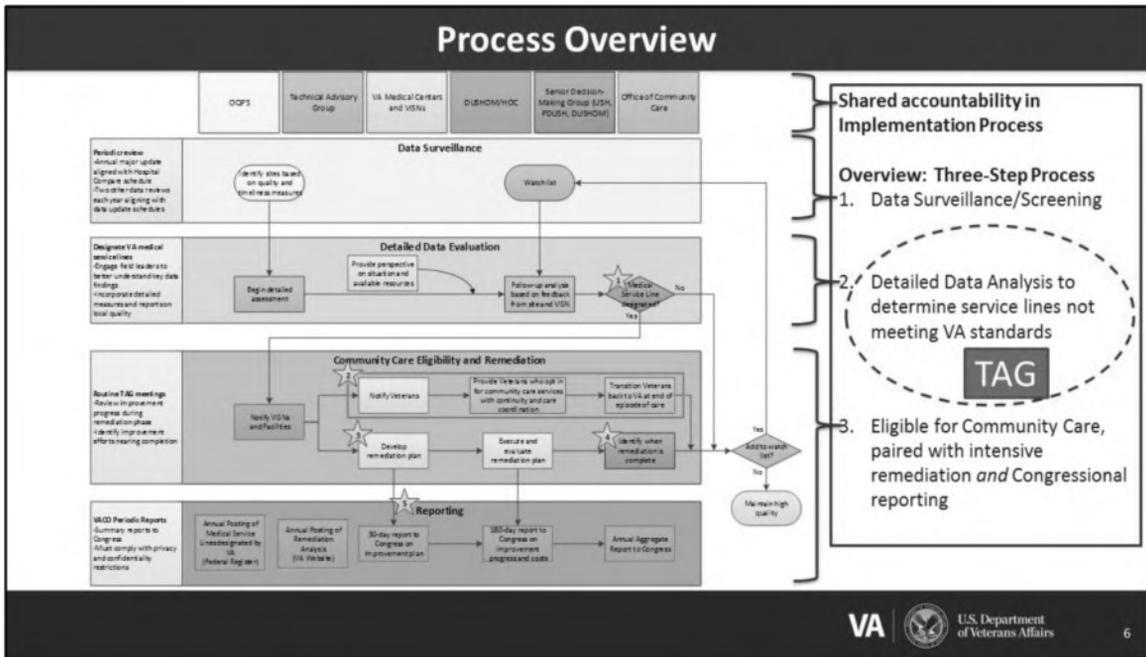

Veterans may be provided the option for community care if a medical service line\* does not meet VA's standards for quality based on two conditions:

- Quality – compared to community (2 or more measures)
- Timeliness – compared to same service line at other VA facilities

*Example: If VA has identified that the cardiology service line at a local VA medical facility is not providing care that meets VA's standards for quality, the Veteran may be able to elect to receive their cardiology care in the community. However, there may be limits on when, where, and what is available under this criterion.*

\*Medical service line - "a specific medical service or set of services delivered in a VA facility."  
Source: VA regulations (AQ-46)

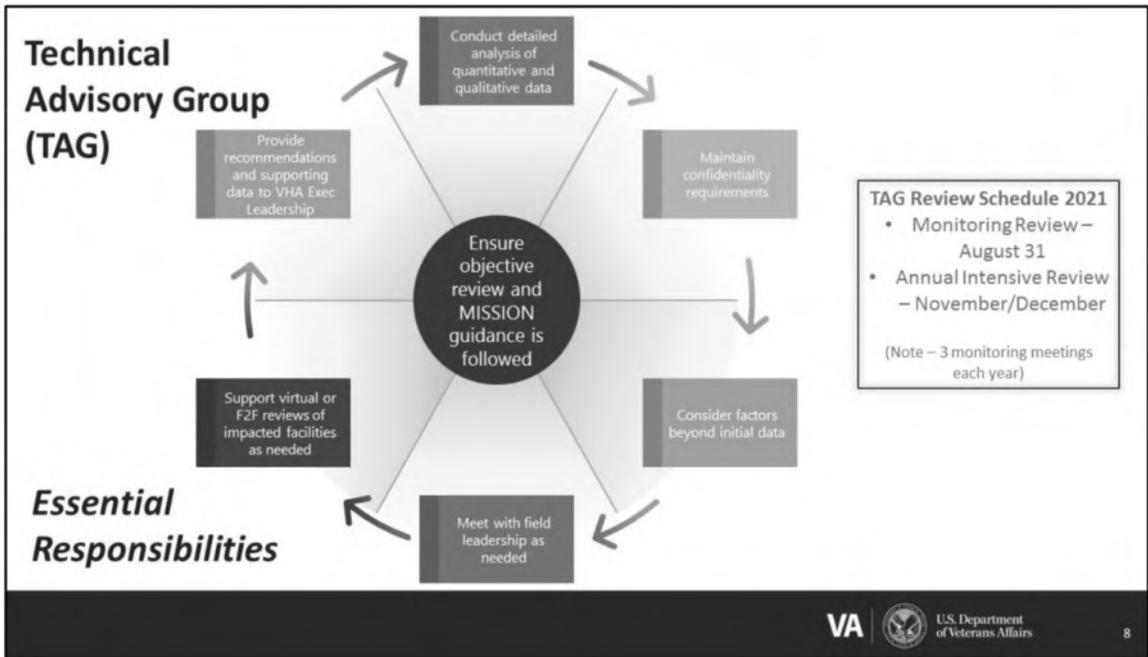

## Surveillance Logic Leading to Technical Advisory Group (TAG) Evaluation

### Data Surveillance

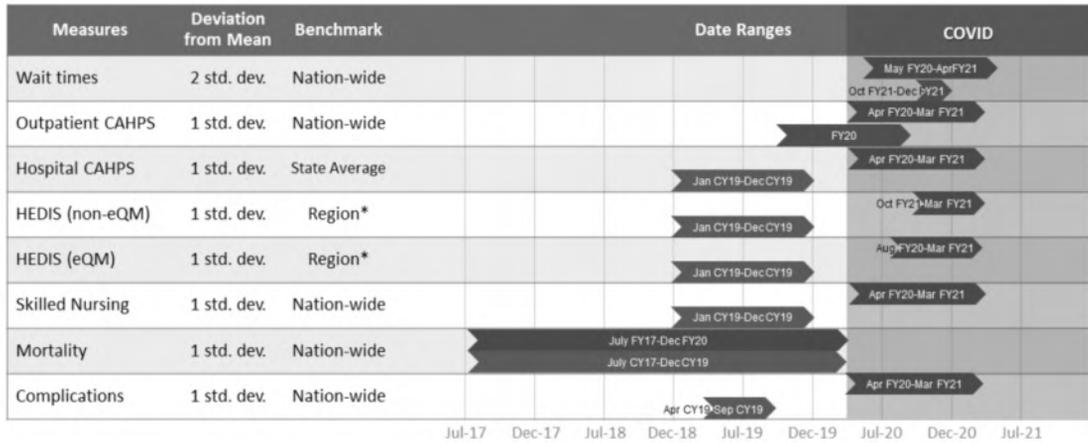

- Measures are triggered through comparisons against a benchmark (one or two standard deviations worse than the benchmark average)
  - Timeliness measures are compared with internal VA data
  - Quality measures are primarily compared with community data
- Medical Service Lines are flagged in timeliness and/or quality
  - Flagging is based on the number of triggered measures
  - For example, Primary Care at Everytown VAMC is flagged in quality due to triggering in two quality measures

### Detailed Data Evaluation

- Any Medical Service Line flagged in both timeliness and quality is brought to the TAG for further evaluation
- The TAG reports Detailed Data Evaluation findings to the Senior Decision-Making Group (USH's Office) to inform their recommendations to the VA Secretary on medical service lines to be designated

## VA and Community Surveillance Data Availability

VA
  Community
  VA Baseline

\*Some facilities were scored against a national benchmark due to a lack of sufficient sample sizes for regional data (flu and tobacco measures)

MISSION TAG Monitoring  
Review August 31, 2021

## Appendix – Supporting Materials

## MISSION Act Requirements

### MISSION Act Requirements – Section 101

- ✓ – Measure quality of a medical service line of a VA facility by comparing it with 2 or more distinct and appropriate quality measures at non-Department medical service lines
- ✓ – Measure timeliness of the medical service line of a VA facility by comparing with the same medical service line at different Department facilities

## Are there differences between the quality criterion and other eligibility criteria for community care?

### Other Eligibility Criteria

- Criteria are applied on a **case-by-case basis** using information **specific to each Veteran**. **Veteran decision to opt-in or opt-out**
- The **decision to use the criteria is made at the clinic or provider level**
- Available for use any time a Veteran is eligible, **without any limit**
- These criteria are **always active**, so Veterans are eligible **any time the conditions are met**

### Standards for Quality

- Criterion applies to the **entire medical service line based on analysis for care**. **Veteran decision to opt-in or opt-out**
- The **decision to use the criterion is made by the VA Secretary** based on the analysis of the data
- **Cap limit placed by Congress on the number of service lines eligible (3 locally and 36 nationally)**
- When the **service line MEETS the standards for quality**, **this eligibility for community care ends**

Diff Infection Surgical Mortality Rate – Severe Complications Care Transition Overall Rating of Hospital

\* No timeliness measures are available for this medical service line, so it is not able to be designated according to MISSION Act requirements.

\*\* Measure not able to be broken out with MSL-specific filters, so same aggregate data is used to flag both MSLs using this measure.

U.S. Department  
of Veterans Affairs

## Factors for Consideration in TAG Evaluation

- VA Regulations specify that consideration of additional factors will occur prior to designation decision
- Consideration during detailed data evaluation is not limited to these factors alone

Factor	Description*
Clinical Significance	Whether the differences between performance of individual VA medical service lines, and between performance of VA medical service lines and non-VA medical service lines are clinically significant.
Ease of Remediation	Likelihood and ease of remediation of the VA medical service line within a short timeframe.
Recent Trends	Recent trends concerning the VA medical service line or non-VA medical service line.
Number of Covered Veterans	The number of covered Veterans served by the medical service line or that could be affected by the designation.
Impact on Patient Outcomes	The potential impact on patient outcomes.
Collateral Effects	The effect that designating one VA medical service line would have on other VA medical service lines.

\* From 38 CFR Part 17 § 17.4015 (e)

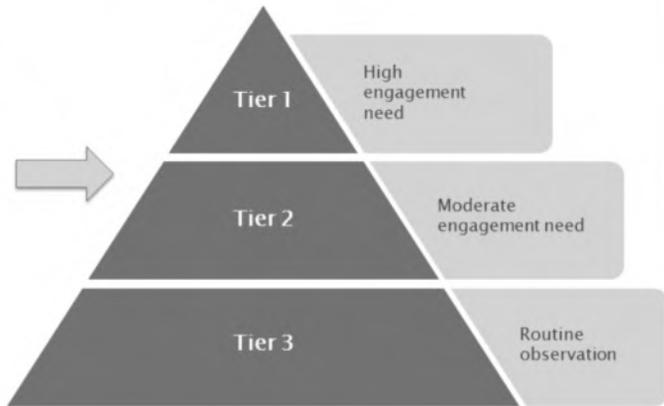

## What about VAMCs needing support outside the MISSION process?

- It is anticipated that there may be VAMCs with medical service lines which are experiencing challenges but do not meet the requirements for MISSION Act related remediation.
- Remediation efforts under the parameters of the MISSION Act are separate from VHA's ongoing consultation, improvement and monitoring activities undertaken by VISNs and VHACO Program Offices.
- **Sites not triggered under MISSION** – the TAG has the option to recommend that a VAMC medical service line (*not triggered under MISSION*) explore support options from the VISN or relevant program office to help drive quality improvement and high value care for Veterans.
- **Sites triggered under MISSION** – the TAG may also recommend additional VISN or programmatic support for sites *triggered under MISSION* as an adjunct to formal remediation. In these cases, reporting of other improvement efforts is completed through existing channels – separate to the specific remediation reporting requirements under the Act.

## QPS/CIC's Engagement Protocol for Improvements in Quality (EPIQ)

### Strategic Engagement Needs Algorithm (SENA)

- **Relative Comparison**
  - ≥40% metrics in 5<sup>th</sup> quintile of SAIL
  - ≥65% metrics in 4<sup>th</sup> or 5<sup>th</sup> quintiles of SAIL
- **Absolute Improvement or Decline**
  - >50% of all SAIL metrics worsened from 1 year ago
  - >50% of all SAIL supporting indicators worsened from 1 year ago
- **Community Comparison**
  - Under-served VA (Mental Health and Primary Care)
  - **MISSION Act (Monitor List)**

## MISSION Act Quality Standards and Related Activities

VHA Office of Quality and Patient Safety (QPS)  
September 1, 2021

**VA**

U.S. Department  
of Veterans Affairs

## MISSION Act Quality – Overview

### **VA Standards for Quality (MISSION Act Section 104 - § 1703C)**

- Identify a common set of quality standards
- Compare performance to the community and analyze at the level of medical service lines
- Serve as the foundation for subsequent eligibility decisions for Community Care

### **Quality Criterion for Community Care Eligibility (MISSION Act Section 101 - § 1703[e])**

- Provides the authority to VA to enable eligibility for Community Care by designating VA medical service lines based on the quality criterion
- Affects VA medical service lines not complying with VA standards for quality, as determined through measures of both timeliness and quality

### **Remediation of Medical Service Lines (MISSION Act Section 109 - § 1706A)**

- Required for designated VA medical service lines
- Requires extensive Congressional response and public awareness

MISSION Act-specific needs, distinct from routine VHA improvement and consultation

## VA Standards for Quality and Measures\*

VHA Standards	Initial Measures
<b>Timely Care:</b> Provided without inappropriate or harmful delays	Patient-reported measures on getting timely appointments, care, and information Wait times for outpatient care
<b>Effective Care:</b> Based on scientific knowledge of what is likely to provide benefit to Veterans	Smoking and Tobacco Use Cessation Immunization for Influenza Breast and Cervical Cancer Screening Mortality Rates - Risk Adjusted Controlling high blood pressure Beta-blocker treatment after heart attack Comprehensive Diabetes Care – Blood Pressure and Glucose control Improvement in function (short-stay nursing home patients) Newly received antipsychotic medications (short-stay nursing home patients)
<b>Safe Care:</b> Avoids harm from care that is intended to help Veterans	Catheter and central line associated infection rates C. difficile infection rate Death rate among surgical patients with serious treatable complications Nursing home safety measures
<b>Veteran-Centered Care:</b> Anticipates and responds to Veterans specific needs	Patient's overall rating of the Provider Patient's rating of Coordination of Care HCAHPS Overall Rating of Hospital HCAHPS Care Transition Measure

\*This represents a condensed version of the list of measures posted on the Federal Register on 10/3/2019

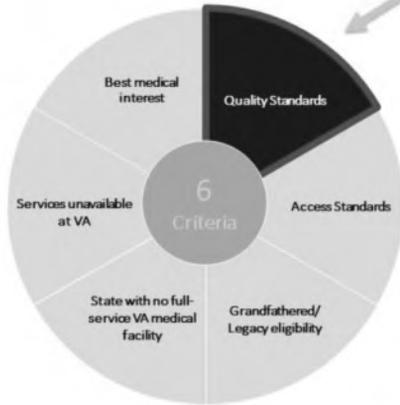

U.S. Department  
of Veterans Affairs

## Things to Remember...

- VA standards for quality reflect care that is **timely, effective, safe, and Veteran-centered**.
- VA **compares its care** to the care provided in the community.
- Where VA compares favorably to the community, **that's great!**
- Where we do not, we are committed to improving our care.
- If there is a **significant or serious concern**, Veterans have the option to receive care in the community for specific medical services that do not meet the VA standards for quality and timeliness while remediations are underway at their VA facility.

## Quality Criterion for Community Care Eligibility Section 101 - § 1703[e]

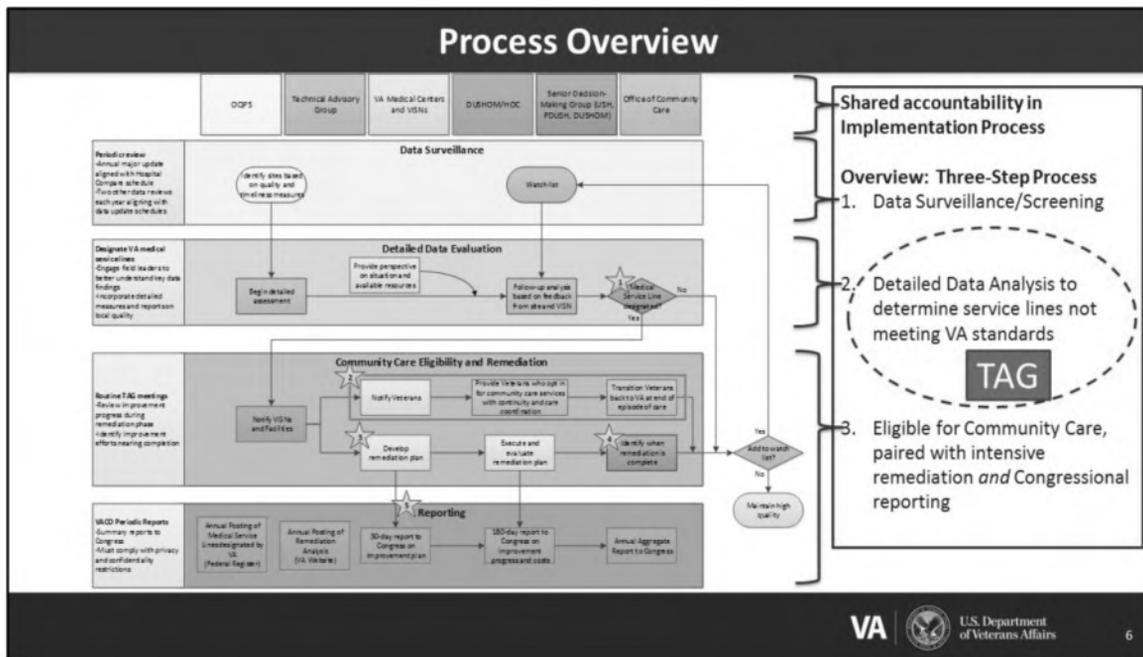

Veterans may be provided the option for community care if a medical service line\* does not meet VA's standards for quality based on two conditions:

- Quality – compared to community (2 or more measures)
- Timeliness – compared to same service line at other VA facilities

*Example: If VA has identified that the cardiology service line at a local VA medical facility is not providing care that meets VA's standards for quality, the Veteran may be able to elect to receive their cardiology care in the community. However, there may be limits on when, where, and what is available under this criterion.*

\*Medical service line - "a specific medical service or set of services delivered in a VA facility."  
Source: VA regulations (AQ-46)

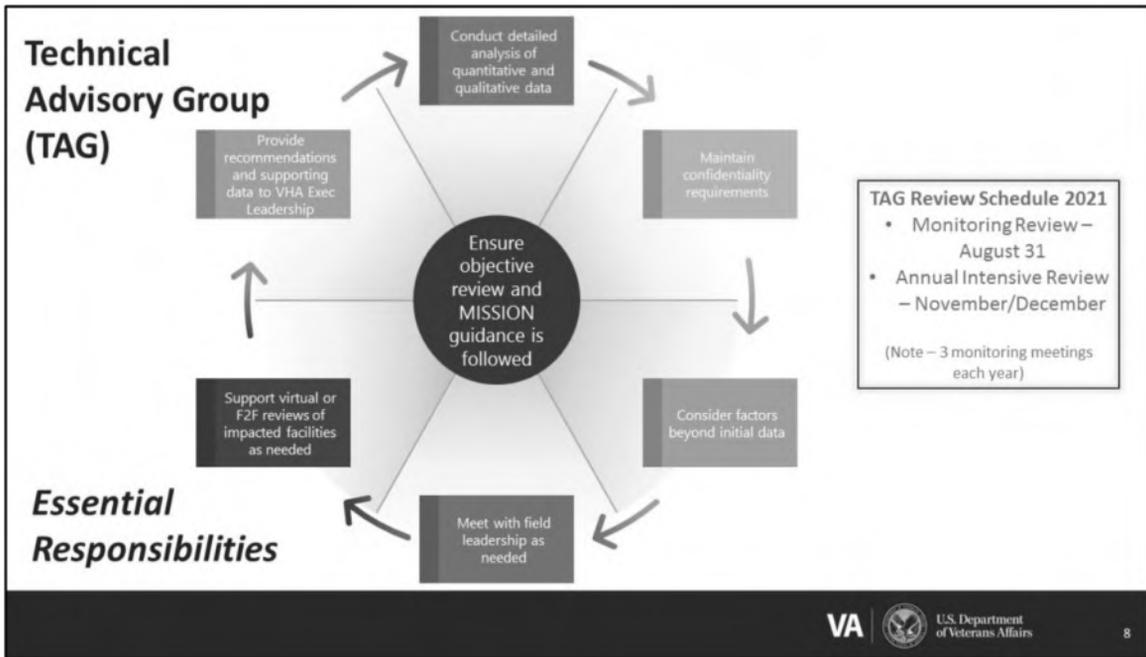

## Surveillance Logic Leading to Technical Advisory Group (TAG) Evaluation

### Data Surveillance

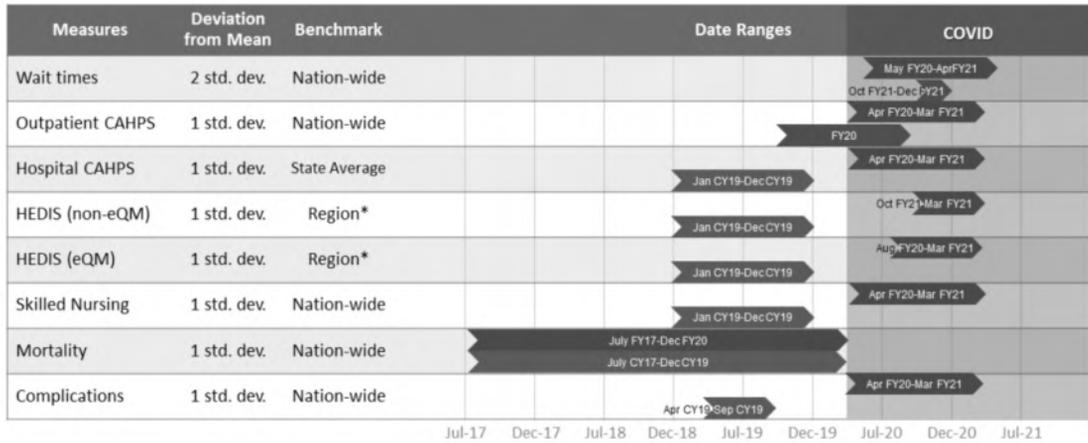

- Measures are triggered through comparisons against a benchmark (one or two standard deviations worse than the benchmark average)
  - Timeliness measures are compared with internal VA data
  - Quality measures are primarily compared with community data
- Medical Service Lines are flagged in timeliness and/or quality
  - Flagging is based on the number of triggered measures
  - For example, Primary Care at Everytown VAMC is flagged in quality due to triggering in two quality measures

### Detailed Data Evaluation

- Any Medical Service Line flagged in both timeliness and quality is brought to the TAG for further evaluation
- The TAG reports Detailed Data Evaluation findings to the Senior Decision-Making Group (USH's Office) to inform their recommendations to the VA Secretary on medical service lines to be designated

## VA and Community Surveillance Data Availability

VA
  Community
  VA Baseline

\*Some facilities were scored against a national benchmark due to a lack of sufficient sample sizes for regional data (flu and tobacco measures)

MISSION TAG Monitoring  
Review August 31, 2021

## Surveillance Summary: Medical Services

(Two sites flagged for TAG review during this surveillance interval)

### Triggering Timeliness Measures (Top 3)

- Cardiology CAHPS Access (24)
- Primary Care CAHPS Access (17)
- Women's Health CAHPS Access (13)

### Triggering Quality Measures

- Flu Immunizations (137)
- CAHPS Provider Rating (13)
- Breast Cancer Screening (12)
- CAHPS Care Coordination (12)
- Cervical Cancer Screening (7)
- DM – Blood Pressure Control (4)

LEGEND		MSL Results from Timeliness Comparison (Internal VA)		
		Flagged	Triggering Measure	No Triggering Measures
MSL Results from Quality Comparison (With Community)	For TAG review before SDMG recommendations	<b>2</b> (2 <b>more</b> than previous surveillance interval)	<b>11</b> (10 <b>more</b> than previous surveillance interval)	<b>16</b> (14 <b>more</b> than previous surveillance interval)
	For standard VHA improvement processes	<b>0</b> (1 <b>fewer</b> than previous surveillance interval)	<b>9</b> (6 <b>more</b> than previous surveillance interval)	<b>124</b> (78 <b>more</b> than previous surveillance interval)
	No performance issues identified	<b>3</b> (3 <b>fewer</b> than previous surveillance interval)	<b>39</b> (20 <b>more</b> than previous surveillance interval)	<b>347</b> (120 <b>fewer</b> than previous surveillance interval)

MISSION TAG Monitoring  
Review August 31, 2021

## Surveillance Summary: Hospital Care

(No sites flagged for TAG review during this surveillance interval)

### Triggering Quality Measures

- CLABSI (18)
- CAUTI (13)
- HCAHPS Hospital Rating (11)
- HCAHPS Care Transition (10)

Due to the lack of timeliness measures, Inpatient medical service lines **may not be designated** by the VA Secretary, per MISSION Act requirements.

LEGEND		MSL Results from Timeliness Comparison (Internal VA)		
		Flagged	Triggering Measure	No Triggering Measures
MSL Results from Quality Comparison (With Community)	For TAG review before SDMG recommendations	N/A	N/A	<b>13</b> (4 <b>more</b> than previous surveillance interval)
	For standard VHA improvement processes	N/A	N/A	<b>24</b> (7 <b>fewer</b> than previous surveillance interval)
	No performance issues identified	N/A	N/A	<b>92</b> (2 <b>more</b> than previous surveillance interval)

MISSION TAG Monitoring  
Review August 31, 2021

## Surveillance Summary: Extended Care Services

(No sites flagged for TAG review during this surveillance interval)

**Triggering Quality Measures:**

*Short Stay*

- Antipsychotic Medications (26)
- Functional Improvement (8)
- Pressure Ulcer (0)

**Triggering Quality Measures:**

*Long Stay*

- Falls with Major Injury (4)
- Physical Restraints (3)

Due to the lack of timeliness measures, Skilled Nursing Home medical service lines **may not be designated** by the VA Secretary, per MISSION Act requirements.

LEGEND		MSL Results from Timeliness Comparison (Internal VA)		
		Flagged	Triggering Measure	No Triggering Measures
	For TAG review before SDMG recommendations			
	For standard VHA improvement processes			
	No performance issues identified			
MSL Results from Quality Comparison (With Community)	Flagged	N/A	N/A	<b>7</b> (3 <b>more</b> than previous surveillance interval)
	Triggering Measure	N/A	N/A	<b>27</b> (3 <b>fewer</b> than previous surveillance interval)
	No Triggering Measure	N/A	N/A	<b>98</b> (same as previous surveillance interval)

## Remediation of Medical Service Lines – Section 109 - § 1706A

- **Required** for those occasions **where VA medical service lines are designated** based on the quality standards criterion for Community Care eligibility
- **Community care eligibility** concludes when **remediation is complete** (service line meets standards)
- Requires extensive response:
  - **Federal Register posting of service lines** that did not meet VA standards
  - **Remediation action plan** submitted within 30 days
  - **Identification of VAMC, VISN, VHA Central Office individuals accountable** for remediation of medical service line to meet VA standards for quality
  - **Ongoing Congressional reporting** of status *and* **cost** of remediation actions
  - Reporting annually on public facing website

MISSION Act-specific needs, distinct from routine VHA improvement and consultation

## Mission Act Quality Standards Tracking Report (MAQSTR)

The MISSION Act Quality Standards Tracking Report (MAQSTR) is designed to help compare VHA performance measure results to comparable community benchmarks

The main report displays:

- Measure Domains
- Short description of performance measures
- Preferred data direction
- Short description of performance measures
- Quarterly and yearly data
- Community scores
- Facility prior year score
- Links to the source reports
- Measure data timeframes

[https://reports.vssc.med.va.gov/ReportServer/Pages/ReportViewer.aspx?/IPEC/NDPP/NDPP\\_Production/NDPP](https://reports.vssc.med.va.gov/ReportServer/Pages/ReportViewer.aspx?/IPEC/NDPP/NDPP_Production/NDPP)

## Appendix – Supporting Materials

## MISSION Act Requirements

### MISSION Act Requirements – Section 101

- ✓ – Measure quality of a medical service line of a VA facility by comparing it with 2 or more distinct and appropriate quality measures at non-Department medical service lines
- ✓ – Measure timeliness of the medical service line of a VA facility by comparing with the same medical service line at different Department facilities

## Are there differences between the quality criterion and other eligibility criteria for community care?

### Other Eligibility Criteria

- Criteria are applied on a **case-by-case basis** using information **specific to each Veteran**. **Veteran decision to opt-in or opt-out**
- The **decision to use the criteria is made at the clinic or provider level**
- Available for use any time a Veteran is eligible, **without any limit**
- These criteria are **always active**, so Veterans are eligible **any time the conditions are met**

### Standards for Quality

- Criterion applies to the **entire medical service line based on analysis for care**. **Veteran decision to opt-in or opt-out**
- The **decision to use the criterion is made by the VA Secretary** based on the analysis of the data
- **Cap limit placed by Congress on the number of service lines eligible (3 locally and 36 nationally)**
- When the **service line MEETS the standards for quality**, **this eligibility for community care ends**

 (b)(6)@va.gov, (b)(6)@va.gov, (b)(6)@va.gov, (b)(6)@va.gov,  
**Sent:** January 5, 2021 9:16 PM (UTC-06:00)

\*Due to technical issues, we are unable to share today's PowerPoint. In the meantime, please follow along with the attachment.

In response to feedback received from Decision Support Tool (DST) users in the field, changes have been made to the DST that will be in effect **June 22, 2020** which make it more user-friendly, help guide the eligibility conversation between VA care teams and Veterans and incorporates a routine update to stop codes. Detailed information is available in Chapter 2, Section 2.9 of the OCC FGB at <https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx>.

These changes include:

- **Community Care** Average Wait Time – DST will display a weighted average wait time for Community Care appointments for the requested clinical service.
- **VHA** Average Wait Time – The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments.
- Clinical Service Synonyms – DST will find the official clinical service name in the drop-down based on a search of common clinical service synonyms.
- Clinical Service Mapping Updates – An update to the Clinical Service mapping to align with the Managerial Cost Accounting Office (MCAO) FY20 Mid-Year Active Stop Codes list.

### **Community Care Average Wait Time**

The Facilities list in DST now shows the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service.

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). DST displays the average wait times of all appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. The Community Care data displayed is for community care appointments associated with the facility and SEOCs associated with the selected clinical service. This information is provided to inform providers, schedulers and Veterans of the comparable wait time in the community so they can make an informed decision when considering community care.

Adding the community care wait time to DST will assist with guiding the conversation between the VA Care Team and the Veteran, regarding their VA and community care options to include average community care wait time.

Please note that community care eligibility based on wait time is still to be determined at the time of scheduling into the specific VA clinic where the Veteran is to be seen.

### **Action Required**

Please share this announcement locally with all clinical and administrative staff members.

In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065.

## **Office Hours**

The Office of Community Care will reinstate the DST Office Hours starting **June 15, 2020**, with these DST updates the scheduled topic. Moving forward the office hours will be held on the third Monday of each month.

Time: 3:00-4:00pm ET

**Sent:** February 16, 2021 10:36 AM (UTC-06:00)

\*Due to technical issues, we are unable to share today's PowerPoint. In the meantime, please follow along with the attachment.

In response to feedback received from Decision Support Tool (DST) users in the field, changes have been made to the DST that will be in effect **June 22, 2020** which make it more user-friendly, help guide the eligibility conversation between VA care teams and Veterans and incorporates a routine update to stop codes. Detailed information is available in Chapter 2, Section 2.9 of the OCC FGB at <https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx>.

These changes include:

- **Community Care Average Wait Time** – DST will display a weighted average wait time for Community Care appointments for the requested clinical service.
- **VHA Average Wait Time** – The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments.
- **Clinical Service Synonyms** – DST will find the official clinical service name in the drop-down based on a search of common clinical service synonyms.
- **Clinical Service Mapping Updates** – An update to the Clinical Service mapping to align with the Managerial Cost Accounting Office (MCAO) FY20 Mid-Year Active Stop Codes list.

### **Community Care Average Wait Time**

The Facilities list in DST now shows the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service.

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). DST displays the average wait times of all appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. The Community Care data displayed is for community care appointments associated with the facility and SEOCs associated with the selected clinical service. This information is provided to inform providers, schedulers and Veterans of the comparable wait time in the community so they can make an informed decision when considering community care.

Adding the community care wait time to DST will assist with guiding the conversation between the VA Care Team and the Veteran, regarding their VA and community care options to include average community care wait time.

Please note that community care eligibility based on wait time is still to be determined at the time of scheduling into the specific VA clinic where the Veteran is to be seen.

### **Action Required**

Please share this announcement locally with all clinical and administrative staff members.

In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065.

### **Office Hours**

The Office of Community Care will reinstate the DST Office Hours starting **June 15, 2020**, with these DST updates the scheduled topic. Moving forward the office hours will be held on the third Monday of each month.

Time: 3:00-4:00pm ET

### **Community Care Average Wait Time**

The Facilities list in DST now shows the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service.

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). DST displays the average wait times of all appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. The Community Care data displayed is for community care appointments associated with the facility and SEOCs associated with the selected clinical service. This information is provided to inform providers, schedulers and Veterans of the comparable wait time in the community so they can make an informed decision when considering community care.

Adding the community care wait time to DST will assist with guiding the conversation between the VA Care Team and the Veteran, regarding their VA and community care options to include average community care wait time.

Please note that community care eligibility based on wait time is still to be determined at the time of scheduling into the specific VA clinic where the Veteran is to be seen.

### **Action Required**

Please share this announcement locally with all clinical and administrative staff members.

In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065.

### **Office Hours**

The Office of Community Care will reinstate the DST Office Hours starting **June 15, 2020**, with these DST updates the scheduled topic. Moving forward the office hours will be held on the third Monday of each month.

Time: 3:00-4:00pm ET

In response to feedback received from Decision Support Tool (DST) users in the field, changes have been made to the DST that will be in effect **June 22, 2020** which make it more user-friendly, help guide the eligibility conversation between VA care teams and Veterans and incorporates a routine update to stop codes. Detailed information is available in Chapter 2, Section 2.9 of the OCC FGB at <https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx>.

These changes include:

- **Community Care Average Wait Time** – DST will display a weighted average wait time for Community Care appointments for the requested clinical service.
- **VHA Average Wait Time** – The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments.
- **Clinical Service Synonyms** – DST will find the official clinical service name in the drop-down based on a search of common clinical service synonyms.
- **Clinical Service Mapping Updates** – An update to the Clinical Service mapping to align with the Managerial Cost Accounting Office (MCAO) FY20 Mid-Year Active Stop Codes list.

### **Community Care Average Wait Time**

The Facilities list in DST now shows the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service.

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). DST displays the average wait times of all appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. The Community Care data displayed is for community care appointments associated with the facility and SEOCs associated with the selected clinical service. This information is provided to inform providers, schedulers and Veterans of the comparable wait time in the community so they can make an informed decision when considering community care.

Adding the community care wait time to DST will assist with guiding the conversation between the VA Care Team and the Veteran, regarding their VA and community care options to include average community care wait time.

Please note that community care eligibility based on wait time is still to be determined at the time of scheduling into the specific VA clinic where the Veteran is to be seen.

**Sent:** March 2, 2021 6:59 AM (UTC-06:00)

\*Due to technical issues, we are unable to share today's PowerPoint. In the meantime, please follow along with the attachment.

In response to feedback received from Decision Support Tool (DST) users in the field, changes have been made to the DST that will be in effect **June 22, 2020** which make it more user-friendly, help guide the eligibility conversation between VA care teams and Veterans and incorporates a routine update to stop codes. Detailed information is available in Chapter 2, Section 2.9 of the OCC FGB at <https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx>.

These changes include:

- **Community Care Average Wait Time** – DST will display a weighted average wait time for Community Care appointments for the requested clinical service.
- **VHA Average Wait Time** – The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments.
- **Clinical Service Synonyms** – DST will find the official clinical service name in the drop-down based on a search of common clinical service synonyms.
- **Clinical Service Mapping Updates** – An update to the Clinical Service mapping to align with the Managerial Cost Accounting Office (MCAO) FY20 Mid-Year Active Stop Codes list.

### **Community Care Average Wait Time**

The Facilities list in DST now shows the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service.

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). DST displays the average wait times of all appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. The Community Care data displayed is for community care appointments associated with the facility and SEOCs associated with the selected clinical service. This information is provided to inform providers, schedulers and Veterans of the comparable wait time in the community so they can make an informed decision when considering community care.

Adding the community care wait time to DST will assist with guiding the conversation between the VA Care Team and the Veteran, regarding their VA and community care options to include average community care wait time.

Please note that community care eligibility based on wait time is still to be determined at the time of scheduling into the specific VA clinic where the Veteran is to be seen.

### **Action Required**

Please share this announcement locally with all clinical and administrative staff members.

In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065.

**Sent:** March 5, 2021 6:40 AM (UTC-06:00)

\*Due to technical issues, we are unable to share today's PowerPoint. In the meantime, please follow along with the attachment.

In response to feedback received from Decision Support Tool (DST) users in the field, changes have been made to the DST that will be in effect **June 22, 2020** which make it more user-friendly, help guide the eligibility conversation between VA care teams and Veterans and incorporates a routine update to stop codes. Detailed information is available in Chapter 2, Section 2.9 of the OCC FGB at <https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx>.

These changes include:

- **Community Care Average Wait Time** – DST will display a weighted average wait time for Community Care appointments for the requested clinical service.
- **VHA Average Wait Time** – The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments.
- **Clinical Service Synonyms** – DST will find the official clinical service name in the drop-down based on a search of common clinical service synonyms.
- **Clinical Service Mapping Updates** – An update to the Clinical Service mapping to align with the Managerial Cost Accounting Office (MCAO) FY20 Mid-Year Active Stop Codes list.

### **Community Care Average Wait Time**

The Facilities list in DST now shows the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service.

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). DST displays the average wait times of all appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. The Community Care data displayed is for community care appointments associated with the facility and SEOCs associated with the selected clinical service. This information is provided to inform providers, schedulers and Veterans of the comparable wait time in the community so they can make an informed decision when considering community care.

Adding the community care wait time to DST will assist with guiding the conversation between the VA Care Team and the Veteran, regarding their VA and community care options to include average community care wait time.

Please note that community care eligibility based on wait time is still to be determined at the time of scheduling into the specific VA clinic where the Veteran is to be seen.

### **Action Required**

Please share this announcement locally with all clinical and administrative staff members.

In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065.

### **Office Hours**

The Office of Community Care will reinstate the DST Office Hours starting **June 15, 2020**, with these DST updates the scheduled topic. Moving forward the office hours will be held on the third Monday of each month.

Time: 3:00-4:00pm ET

\*Due to technical issues, we are unable to share today's PowerPoint. In the meantime, please follow along with the attachment.

In response to feedback received from Decision Support Tool (DST) users in the field, changes have been made to the DST that will be in effect **June 22, 2020** which make it more user-friendly, help guide the eligibility conversation between VA care teams and Veterans and incorporates a routine update to stop codes. Detailed information is available in Chapter 2, Section 2.9 of the OCC FGB at <https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx>.

These changes include:

- **Community Care Average Wait Time** – DST will display a weighted average wait time for Community Care appointments for the requested clinical service.
- **VHA Average Wait Time** – The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments.
- **Clinical Service Synonyms** – DST will find the official clinical service name in the drop-down based on a search of common clinical service synonyms.
- **Clinical Service Mapping Updates** – An update to the Clinical Service mapping to align with the Managerial Cost Accounting Office (MCAO) FY20 Mid-Year Active Stop Codes list.

### **Community Care Average Wait Time**

The Facilities list in DST now shows the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service.

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). DST displays the average wait times of all appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. The Community Care data displayed is for community care appointments associated with the facility and SEOCs associated with the selected clinical service. This information is provided to inform providers, schedulers and Veterans of the comparable wait time in the community so they can make an informed decision when considering community care.

Adding the community care wait time to DST will assist with guiding the conversation between the VA Care Team and the Veteran, regarding their VA and community care options to include average community care wait time.

Please note that community care eligibility based on wait time is still to be determined at the time of scheduling into the specific VA clinic where the Veteran is to be seen.

**Action Required**

Please share this announcement locally with all clinical and administrative staff members.

In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065.

**Office Hours**

**Sent:** March 12, 2021 6:29 AM (UTC-06:00)

\*Due to technical issues, we are unable to share today's PowerPoint. In the meantime, please follow along with the attachment.

In response to feedback received from Decision Support Tool (DST) users in the field, changes have been made to the DST that will be in effect **June 22, 2020** which make it more user-friendly, help guide the eligibility conversation between VA care teams and Veterans and incorporates a routine update to stop codes. Detailed information is available in Chapter 2, Section 2.9 of the OCC FGB at <https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx>.

These changes include:

- **Community Care Average Wait Time** – DST will display a weighted average wait time for Community Care appointments for the requested clinical service.
- **VHA Average Wait Time** – The internal appointment data logic in DST will temporarily be adjusted to capture pending or completed appointments back to January 1, 2020 and forward as a result of the COVID-19 impact on VHA appointments.
- **Clinical Service Synonyms** – DST will find the official clinical service name in the drop-down based on a search of common clinical service synonyms.
- **Clinical Service Mapping Updates** – An update to the Clinical Service mapping to align with the Managerial Cost Accounting Office (MCAO) FY20 Mid-Year Active Stop Codes list.

### **Community Care Average Wait Time**

The Facilities list in DST now shows the average wait time for community care appointments so that Veterans and providers can compare the average wait times between VHA and the community for the selected clinical service.

Community care wait time is calculated by determining the average time from the date a community care appointment is made to the date of the appointment itself, as recorded in Health Share Referral Manager (HSRM). DST displays the average wait times of all appointments booked or completed under Standard Episodes of Care (SEOCs) related to the requested clinical service, based on a rolling 90-day assessment. The Community Care data displayed is for community care appointments associated with the facility and SEOCs associated with the selected clinical service. This information is provided to inform providers, schedulers and Veterans of the comparable wait time in the community so they can make an informed decision when considering community care.

Adding the community care wait time to DST will assist with guiding the conversation between the VA Care Team and the Veteran, regarding their VA and community care options to include average community care wait time.

Please note that community care eligibility based on wait time is still to be determined at the time of scheduling into the specific VA clinic where the Veteran is to be seen.

## **Action Required**

Please share this announcement locally with all clinical and administrative staff members.

In order to access the latest version of DST, ensure that you have installed the most current version of Consult Toolbox. As of May 10, 2020, all workstations should have installed Consult Toolbox v1.9.0065.

## **Office Hours**

The Office of Community Care will reinstate the DST Office Hours starting **June 15, 2020**, with these DST updates the scheduled topic. Moving forward the office hours will be held on the third Monday of each month.

Time: 3:00-4:00pm ET
